25A Pinedale Tips

AIR CONDITIONING

The reverse cycle wall mounted air conditioners will heat and cool the room and work well all year round. There is a remote control for these units.

FRIDGE

Each room has its own designated fridge located in the lounge room.

RETIC

The rear patio has a bush that is climbing up the fence and this has retic set to come on twice a week.

PLEASE CHECK YOUR ROOM HAS THE FOLLOWING
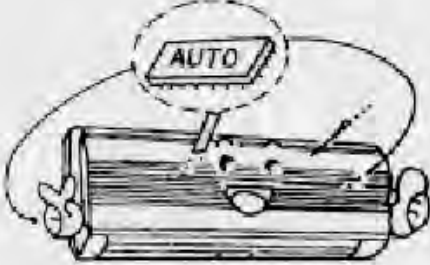

Desk, chair, bed

carton**

Functions

Cooling you for summer	Dehumidifying on rainy days or in humid seasons
On hot days, your TECO Split System air-conditioner can cool room air by transferring the heat out.	Teco air-conditioners can dehumidify and make the room air dry without reducing room temperature, making the room air more comfortable.
Operating automatically	**Heating in winter** (Reverse Cycle Models)
According to room temperature, you can set the microcomputer to change automatically. COOL or HEAT or DRY operation mode which ever is the best effective for your comfort.	Your TECO Reverse Cycle Split System, can supply warm air to raise the room temperature on cold seasons. Did you know that this is the cheapest form of home heating?

※	Indoor side DB/WB(℃)	Outdoor side DB/WB(℃)
Maximum cooling	27/19	35/24
Maximum heating	21/—	24/18

Working Voltage: 50Hz 240V

Installation Precaution:

① To prevent possible electrical shocks due to potential failure, the unit must be Earthed adequately.

② Provide a power circuit exclusively for each unit, and supply a circuit breaker for the correct current and an Earth Leakage Circuit Breaker (ELCB) protector should be provided for each unit.

③ All wiring must be done in accordance with the wiring system diagram, and in accordance to Australian Standards.

④ Wrong wiring may cause the unit to malfunction or become damaged.

⑤ Please disconnect the power plug or cut off the power supply when not in use.

Operation mechanism

Cooling cycle

Connected via pipes, indoor unit and outdoor unit form a refrigeration system. With power, compressor takes in low temperature and low pressure refrigerant then commences to compress the liquid gas which is now vaporised into the evaporator of indoor unit, compressing the gas into high temperature and high pressure gas, then discharging this gas into the condenser of outdoor unit. Helped by an axial-flow fan, heat is removed to outdoor air from the gas which then re-condenses back into liquid, the flow of liquid is now controlled, and the liquid starts to drops temperature and pressure. There, helped by another cross-flow fan, the liquid now absorbs heat from room air, evaporates and becomes low pressure vapour which then flows into compressor again, beginning next cooling cycle. Therefore, heat is transferred from indoor to outdoor, and room gets cooler and cooler.

Ventilation cycle
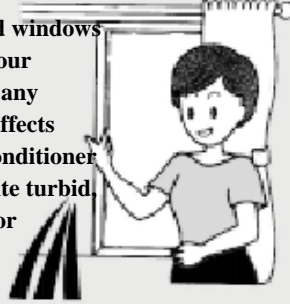

Ventilation cycle activates and divides the indoor and outdoor into two parts. With air movement provided by the cross-flow fan, room air continues to flows through filters, exchanges heat in evaporator, then returns to the room. In this way, room air can be cooled and dehumidified.
At the same time, filtering the room air.
Heating cycle

TECO's Reverse Cycle type air conditioners use a reversing valve (4-way electromagnetic valve) to change refrigerant flow direction. When heating, refrigerant firstly enters indoor heat-exchanger, releasing heat and condensing. Then it enters the outdoor heat-exchanger, absorbing heat and evaporating. Because power consumption is used and converted into heat which is discharged in room, heating efficiency is very good, which means it saves you money. Reverse Cycle heating is the cheapest form of home heating today.

Important notices

Teco Air Conditioners should be operated with stable voltage in the range of 206-244V~1Ph Otherwise, the compressor may vibrate causing damage to the refrigeration system.

50Hz 240Volts

Do not pull on power cords Cables or plugs.

Do not insert any foreign materials   into the air inlet or air outlet,   this is very dangerous due to the moving fans

Try to keep all doors and windows closed while operating your air conditioner avoiding any heat gain or loss which affects how effective your air-conditioner can be. If room air is quite turbid, you should open a door or window little some outdoor fresh air.

Remember ONLY qualified and authorised technicians can operate and work with the PROHIBITED GASES contained in your air-conditioning system

Connection of the refrigerant and electrical systems must be carried out by persons whom are licensed., it's the LAW!

Compressor Delay operation

To avoid action of the overload protector and or other security devices, TECO design a delay for 3~4 minutes before starting the cooling or heating or dehumidifying cycle in following situations:

.
1.   To start again after Stopping;
2.   To adjust operation mode

Smell

Sometimes you may smell funny odours from your air-conditioner this is normal, however sometimes the indoor can send out some odour, this is because the air has mixed with the smell of furniture and any smoke on the air.

Electric circuit

The must be a special electric circuit dedicated for the air-conditioner, do not use longer power lines, do not share the same outlet for another appliance.

TIMER ON button
At stopping, press TIMER ON button, set ON TIME in range of 0 to 24 hour to start the unit automatically.
COOL mode operation procedure

According to difference between room temperature and the "Set Temperature" the microcomputer can control cooling on or not:

- If room temp. is higher than set temp., compressor runs at COOL mode.
- If room temp. is lower than set temp., compressor stops and only indoor fan motor runs.
- SET TEMP. should be in range of 16   to 30   .

4.Press FAN button, set fan speed.

3.Press SWING button, set the louvers start to rotate automatically, and stop when repress.

5.Press TEMP. button, set suitable SET TEMP.

2.Press MODE to select different operation mode.

1.Press 1/0 button, your TECO air-conditioner is ready to use.

HEAT mode operation procedure

- If room temp. is lower than set temp., compressor runs at HEAT mode;
- If room temp. is higher than set temp., compressor and outdoor fan motor stop, only indoor fan motor runs.
- SET TEMP. should be in range of 16℃ to 30℃.

3.Press SWING button, the louvers start to rotate automatically, and stop when repress it.

4.Press FAN button, set fan speed.

5.Press TEMP. button, set suitable SET TEMP.

TIMER mode operation procedure

At stopping, press TIMER ON button, set ON TIME in range of 0 to 24 hour to start the unit automatically.

At operating, press TIMER OFF button. set OFF TIME in range of 0 to 24 hour to stop the unit automatically.

How to insert batteries

NOTE:

- Don't mix new and old or different batteries.
- Remove batteries when not in use for a long time.
- The remote control signal can be received at a distance of up to about 10m.

ACL
2 Insert the two AAA batteries
OPEN

1 Remove the cover
3 Re - attach the cover.

Emergency Operation procedure

You can operate your TECO without the controller, by opening the fascia panel and operate as follows:

Start	At stopping, press AUTO button, start the air conditioner at AUTO mode operation.	*According to room temp. change, microcomputer can automatically set COOL or HEAT or DRY operation mode, so as for best effect. *The OPERATION indicator keeps light while compressor runs.
Stop	At operation, press AUTO Button , stop the air conditioner.	*Both indoor unit and outdoor unit stop at the same time.

*The left TEST button is only for testing air conditioner. When it is pressed, no matter what room temp. is, air conditioner keeps cooling, so do not use it for normally operation.

Air flow direction adjustment procedure

| 1.Adjusting up/down air flow direction	
Using the remote controller, adjust air flow direction by rotating the UP/DOWN deflectors up and down automatically or stopping at an angle. * Press SWING button, the deflectors start to rotate and stop when repress. * Press DIRE button once or for a moment, the deflectors move a special angle except they are rotating automatically.	As shown, move the LEFT/RIGHT deflectors by hand, adjust air flow left or right or three different directions to every corner of room so as to make everywhere temp . average.
deflectors

Adjusting left/right air flow direction

Weather is unpredictable so your new system can comfort you during the hot summers or the coldest winters. Remember that keeping your filters clean will provide you with the best air conditioned and filtered air	Remember to keep all your documents as the warranty is your protection and you will require these later should warranty be required

|	
Outdoor temp. should be in range of 18℃to 40℃, otherwise it is possible for air conditioner to breakdown. Room temp. should be in range of 18℃to 32℃ Room humidity should be lower than 80%, otherwise it is possible to dew at air conditioner r surface and even drop water.	After compressor continually working more than 8 minutes, and evaporator pipe temp. keeping no higher than 0℃in 3 minutes ,the compressor and outdoor fan motor stop, while indoor fan motor runs at SET SPEED. When evaporator pipe temp. is not lower than 8℃,and after 3 minutes delay, a I conditioner restores previous operation.
DRY mode operation	HEAT mode operation
Outdoor temp. should be in range of 18℃to 40℃ otherwise it is possible for air conditioner to breakdown or not start. Room temp. should be in range of 18℃to 32℃	Outdoor temp. should be over 0℃ otherwise it is possible for protect devices inside to act and air

Installation position	Noise
* Drain the condensed water from indoor unit into ground pipe. * Install indoor unit far away TV set or radio etc., to avoid disturbing video or voice. * In salt and coastal area or place where is near thermal springs and polluted by various gases, or other special areas, please contact with seller before use. * Avoid place where is possible for flammable gas to leak out. * Avoid other heat sources or direct sun light. * Avoid place where is easy for children to touch.	* Install on place firmly enough to avoid transmitting or increasing noise and vibration. * Do not put objects in front of outdoor unit air outlet, to avoid increasing noise. * Be sure not to make trouble to neighbors with hot air or noise from outdoor unit. * Please contact with seller as soon as there is strange noise during operation.

Remove	Electric lines location
When remove air conditioner to other place, it needs special technician, so contact with seller firstly.	* Must connect with ground. * Must use rated voltage and electric circuit specific for air conditioner. * Avoid octopus type of multi-plug which would cause over heat. * Do not pull power lines strongly. * To fit an electrical leakage-proof switch, please contact with special electric seller. * Chose proper fuse to meet with the current specification. * Power lines should be thick enough.

Earth wire Do not connect earth wire to following places:

Water pipe
Sometimes, there is some plastic material such as Polythene used as part of water pipe, which is not available for earth.

Gas pipe
If there is electrical leakage accidentally from air conditioner, it is easy to cause fire or explosion, as is very dangerous.

- All the electrical work must be done by qualified personnel according to relative wiring regulation and this manual.
- The power supply is type Y connection. If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard.
- The rated voltage and the exclusive circuit must be used.
- Leakage circuit-breaker and air switch of correct capacity must be installed. The air switch of 25A should be used in these models.
- The plug must be accessible after the appliances have been positioned.

Care and maintenance

Cleaning unit

1.Plug out first before cleaning.

Plug out only after air conditioner stops at all.

2.Clean surface panel with a soft and dry cloth ,which is soaked warm water below 40℃

Must dry the cloth by hands before cleaning

3.Do not use chemical solvent for cleaning.

4.Do not splash water directly to indoor unit, in which there are microcomputer and circuit plate, they must not be touched by water.

Accident will happen.

* Check earth wire

Is it broken or loose?

Cleaning filters

Air filters should be cleaned once every
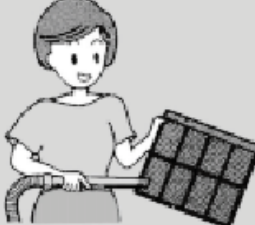

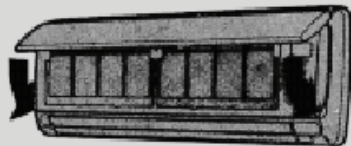

1.Open surface panel only after air conditioner stops completely
①Pull here up (both sides of the surface panel)
②Push filters up till hooks are free
③Pull down and take out filters.

2.Clean filters with a vacuum cleaner or by typing them gently.
If they are very Dirty ,wash them in warm water below 40℃dissolved with neutral scouring agent, then dry them in cool air.

3.Insert them at original position, then push down and close surface panel.

* Check air inlet and outlet of outdoor unit.
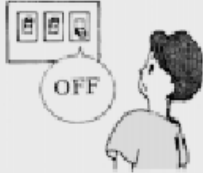

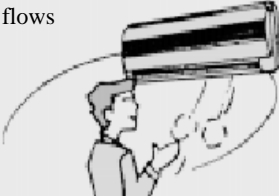

Air lock could result in bad efficiency.

- All the electrical work must be done by qualified personnel according to relative wiring regulation and this manual.
- The power supply is type Y connection. If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard.
- The rated voltage and the exclusive circuit must be used.
- Leakage circuit-breaker and air switch of correct capacity must be installed. The air switch of 25A should be used in these models.
- The plug must be accessible after the appliances have been positioned.

What to do is a malfunction occurs?

Please check the following items before ask for repair, it saves your time and money.

Fault phenomenon	Trouble shooting
Air conditioner does not operate at all.	* Is power fail? * Is plug out? * Is power fuse or switch off? * Is voltage higher than 240V or lower than 206V? * Is SET TIME suitable?
Cooling efficiency is not good.	* Is air inlet or outlet locking? * Is there any other heat source in room? * Are air filters dirty very much? * Is indoor fan speed set at LOW? * Is SET TEMP. suitable?
Wireless remote controller is not available.	* If disturbed abnormally or operation modes changed too frequently, sometimes the electric controller would lose function. Please plug out and plug in again, it maybe OK. * Check batteries of wireless remote controller, if voltage is little, change batteries. * If wireless remote controller displays unclear or displays all symbols, please change batteries.
Foggy air flows out.	* At COOL or DRY mode operation, sometimes there is foggy air flowing out of indoor unit, this is because that room humid air has been cooling rapid.

Immediately stop all operations and plug out, contact with your seller in the following situations.

* Operation starts or stops abnormally;
* Power fuse or switch often breaks;
* Carelessly splash water or something into air conditioner;
* Electrical lines are much hot or lines cover breaks;
* Other strange situations.

Teco warrants this product free from manufacturers defects for a period of FIVE Years *** guarantee for all parts and labour required to fix our defects, this only applies to domestic application and we offer only a 12 months warranty if the product is used in a commercial premises.

Use and Maintenance

Warnings

Disconnect the power cord from the wall outlet during an electrical storm.
• Not doing so may result in fire or electric shock.

Do not insert any metal objects, such as a screwdriver, paper clip, or bent wire into the ventilation openings or AV terminals.
• Doing so poses a serious risk of fire or electric shock.
Do not allow children to climb or hang on the unit.
• The unit could topple over onto a child and result in serious injury.

Never disassemble or modify the unit in any way. Do not attempt to service the unit yourself.
• Doing so may result in fire or electric shock. If the unit requires repair, contact the service center.

Cautions

When not using the unit for long periods of time, disconnect the power cord from the wall outlet.
• Dust could accumulate over time on the unit and cause it to generate heat and ignite, or deteriorate insulation, which in turn may result in an electrical fire.

When moving the unit, be sure to turn off the unit and unplug the power cord from the wall outlet.
• Moving the unit with the power cord connected to the outlet may cause damage to the cord, resulting in fire or electric shock.
• Failure to do so may result in fire or electric shock.

If you notice any unusual odors or smoke around the unit, immediately disconnect the unit from the outlet and contact the service center.
• Failure to do so may result in fire or electric shock.

When removing the batteries from the remote control, make sure children do not swallow them. Keep the batteries out of the reach of infants and children.
• If a child has swallowed a battery, seek medical attention immediately.

Always use two or more people to lift or move the unit.
• If the unit is dropped, it could be damaged or otherwise cause injury.

Wipe off any moisture, dirt, or dust on the power plug pins with a clean dry cloth.
• Failure to do so may result in fire or electric shock.

It is advisable to clean the interior of the unit at least once a year. Contact the store of purchase or service center for information.
• Continuing to use the unit without cleaning of the dust build-up inside it may result in fire or electric shock.

Always turn off the unit and unplug the power cord when cleaning the unit. Use a soft dry cloth to clean the unit.
• Never clean with industrial strength polish wax, benzene, paint thinner, air freshener, lubricant, detergent, or other such chemicals. Also, do not clean with a damp cloth.

Important Safety Instructions

Warnings and Precautions

To prevent any injuries, the following safety precautions should be observed in the installation, use, servicing and maintenance of this equipment.

Before operating this equipment, please read this manual completely, and keep it nearby for future reference.

1) Read these instructions.

2) Keep these instructions.

3) Heed all warnings.

4) Follow all instructions.

5) Do not use this apparatus near water.

6) Clean only with a dry cloth.

7) Do not block any of the ventilation openings. Install in accordance with the manufacturer's instructions.

8) Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.

9) Do not defeat the safety purpose of the polarized or grounding type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong is provided for your safety. When the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.

10) Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.

11) Only use the attachments/accessories specified by the manufacturer.

12) Use only with a cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.

DVD Operation
Downmix

· LT/RT

A disc recorded multi channel soundtrack, the output signal will be incorporated to left and right channel.

· Stereo

A disc recorded multi channel soundtrack, The output signal will be incorporated to stereo.
Important Safety Instructions

13) Unplug this apparatus during lightning storms or when unused for long periods of time.

14) Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

• Apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with an arrowhead symbol, within an equilateral triangle is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

59-En

Apparatus with Class I construction shall be connected to a Mains socket outlet with a protective earthing connection.

WARNING
TO PREVENT DAMAGE WHICH MAY RESULT IN FIRE OR ELECTRIC SHOCK HAZARD, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

Caution :
- These servicing instructions are for use by qualified service personnel only.
  To reduce the risk of electric shock, do not perform any servicing other than that contained in the operating instructions unless you are qualified to do so.
- Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Important safety information

Earthing information

This apparatus must be earthed. To ensure safe operation, the earthed plug must be inserted only into a standard earthed power outlet which is effectively earthed through normal household wiring. Extension cords used with the equipment could be hazardous. The face that the equipment operates satisfactorily only means it is earthed, but the installation may not necessarily be safe. For your safety, if in any doubt about the effective earthing of the equipment or power outlet, please consult qualified service personnel.

WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS
APPLIANCE TO RAIN OR MOISTURE. TO AVOID ELECTRIC SHOCK, INSERT
THE PLUG FULLY INTO THE POWER OUTLET.

Product disposal

Do not dispose of the LCD television with general household waste. The LCD screen contains a small amount of liquid crystal and mercury. For disposal or recycling information, please contact your local authorities.

Safety precautions

Please read all of these instructions before you operate your television and save these instructions for later use. This unit has been engineered and manufactured to ensure your personal safety, however, improper use can result in electric shock or fire hazard. In order not to defeat the safeguards incorporated in this equipment, please observe the following basic rules for its installation, use and servicing.

- Always unplug this LCD television from the wall outlet before cleaning.
- Do not use liquid cleaners or aerosol cleaners. Use a soft cloth moistened with water for cleaning.
- Use only the attachments recommended by the television equipment manufacturer.
- Do not use this LCD television near water, for example, near a bath tub, washbowl, kitchen sink or laundry tub, in a wet basement, or near a swimming pool.
- Do not place this LCD television on on unstable surfaces, stand, or cart. The LCD television may fall, causing serious injury to a child or an adult and seriously damaging the equipment.
- When moving the LCD television, hold under the main unit. Do not grab the base when moving. The base could come off, causing you to drop the LCD television, possibly resulting in damage to the LCD television or causing injury.
- The LCD Television should be moved with care. Quick stops, and uneven surfaces when transporting may lead to damage of the LCD Ltelevision.
- Slots and openings in the back or bottom of the cabinet are provided for ventilation. To ensure reliable operation of the LCD television and to protect it from overheating, these openings must not be blocked or covered. This LCD television should not be placed in an enclosed installation such as a bookcase unless proper ventilation is provided.

III

English

Wall Mount Installation

(For reference only)

Wall mount items (sold separately) allow you to mount the TV on the wall.
For detailed information on installing the wall mount, see the instructions provided with the Wall Mount items. Contact a technician for assistance when installing the wall mounted bracket.

TECO Australia is not responsible for any damage to the product, property or injury to yourself or others if you elect to install the TV.
Do not install your Wall Mount Kit while your TV is turned on. It may result in personal injury due to electric shock.
Remove the stand and fasten with two screw.

NOTE:
*Mounting interface dimensions(200mm*100mm)

* Screw Size: M6×14mm

31

- The openings should never be covered with a cloth or other material and the bottom openings should not be blocked.
- This LCD television should be operated only from a power source indicated on the marking label.
- As a safety feature, this LCD television is equipped with an earthed power plug. If the plug does not fit in your power outlet, contact your electrician. Do not modify the plug and defeat this safety feature.
- Do not allow anything to rest on the power cord. Do not locate the LCD television where the cord may be damaged due to lightning and power-line surges.
- Follow all warnings and instructions marked on the LCD television.
- If an outdoor antenna is connected to the LCD television, be sure the antenna system is earthed so as to provide some protection against voltage surges and static charges.
- For added protection for this LCD television during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna. This will prevent damage to the equipment due to lightning and power-line surges.
- An outdoor antenna system should not be located in the vicinity of power lines or other electric light or power circuits, or where it can fall into such power lines or circuits. When installing an outdoor antenna system, extreme care should be taken to keep from touching such power lines or circuits as contacting them could be fatal.
- Do not overload wall outlets and extension cords as this can result in fire or electric shock.
- Never push any kind of objects into this LCD television through cabinet slots as they may touch dangerous voltage points or result in short-circuits of internal parts. This could result in a fire or electric shock. Never spill any kind of liquid on the LCD television.
- Do not attempt to service the LCD television by yourself because opening or removing covers may expose you to dangerous voltage or other hazard. Refer all servicing to qualified service personnel.
- Unplug this LCD television from the wall outlet and refer servicing to qualified service personnel under the following conditions:
 — When the power cord or plug is damaged or frayed.
 — If liquid has been spilled into the LCD television.
 — If the LCD television does not operate according to the operating instructions, please just adjust those items that are covered by the operating instruction because improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the LCD television to normal state.
 — If the LCD television has been dropped or damaged.
 — When the television comes about a distinct change in performance —this maybe indicates the need of servicing.
- After the servicing of the LCD television, please ask the service technician to perform routine safety checks to determine that the television is in safe operating condition.
- If needing to replace parts, please make sure that the replaced parts that the service technician adapts are specified by the manufacturer that have the same characteristics as the original parts. Unauthorized substitutions may result in fire, electric shock, or other hazards.
- Note to CATV system installer: the note reminds the CATV system installers that the cable earth should be connected to the earthing system of the building as close to the point of cable entry practical as possible.
- Wall mounting should follow the manufacturer instructions, and should use a mounting kit approved by the manufacturer.
- The LCD television should not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the LCD television.
- A warning that excessive sound pressure from earphone and headphones can cause hearing loss.

Troubleshooting

## No power

- Make sure the TV and the power cord are connected correctly.
- Check if you pressed POWER on the remote control unit. If the indicator in the front panel is red, press POWER on the remote control or the front control panel.

LCD TV does not operate

- External influences such as lightning or static electricity may cause improper operation. In this case, operate the unit after first turning on the power, or unplugging the AC cord and plugging it in again after 1 to 2 minutes.

Power is cut off suddenly

- Check if the off timer or sleep timer are set.
- The unit's internal temperature has increased. Remove any objects blocking the vents and clean them to remove dust.

Remote control unit does not operate

- Check if the batteries are inserted with the polarity(+,-)correctly aligned.
- Check if the batteries are discharged. Please replace with new batteries.
- Make sure that you do not use the remote control under strong or fluorescent lighting.
- Check if there is a fluorescent light illuminated near the remote control sensor.
- The path of the remote control beam may be blocked;please make sure the path is clear and that remote control is aimed at the remote control sensor in the TV .

Picture is cut off /with side bar screen

- Check if the image position is correct.
- Check if the screen mode adjustments such as picture size are set correctly.

Strange colour, light colour, or colour misalignment

- Is the room too bright? The picture may look dark in a room that is too bright.
- Check the input signal setting.

CAUTION: If the set is not going to be used for a long period, such as during a vacation, remove the plug from the wall outlet to economise power. (If the TV set is plugged in , a slight current still flows, even the power button is in OFF position.)

Handling the LCD screen

- Direct sunlight on the LCD screen can cause damage to the screen. Take care when you are placing the television near a window.
- Do not push or scratch the LCD screen. Do not place heavy objects on the LCD screen. Those may cause the screen to lose conformity or cause the LCD panel to malfunction.
- If the TV is used in a cold place, fuzzy image may appear on the screen. This is not a malfunction. The screen will be normal as its temperature rises to the normal operating level.
- If a still picture is displayed for a long period of time on the television screen, ghosting may occur for a while. The ghosting will eventually disappear.
- Displaying a static image for a long period of time on the television screen may cause burn-in.
- If the LCD panel becomes warm during operation, this is normal and not a malfunction.

Handling of broken glass and liquid crystal leakage

If the LCD panel is damaged, crystalline liquid leakage may occur, or scattered broken glass may result. Do not touch broken glass or crystalline liquid (which is toxic) with bare hands that have cuts or skin irritation as poisoning may result. If any crystalline liquid gets into mouth or eyes, rinse thoroughly with clean water and consult your doctor.

Overview of the LCD TV

Congratulation on purchasing the TECO LCD Colour Television. This product has been designed to provide you with a variety of audio and video experience, along with an easy and convenient connection. This LCD television enables you to watch broadcast or cable television, channels, connect a VCR, VCD or DVD player to watch your favorite movies or connect to a computer. The television is equipped with convenient control buttons and a handy remote control to let you adjust the television settings and customize the television preferences through an easy-to -use on screen menu system.

Features

Enjoy the versatility of your LCD TV with its wide variety of features:
• Colour active matrix TFT LCD TV with remote control
• Safe, sturdy construction
• Maximum resolution: 1366 x 768
• Audio / Video support:
　—HDMI input
　—RF input
　—YPbPr input
　—S-Video/Audio input
　—PC input
　—PC Audio input
　—AV input
　—Coaxial output
　—USB
• On-Screen Display (OSD) menu system
• Built-in 2 speakers

List of Parts

When you unpack this LCD TV, make sure the box contains the following items:

● LCD Colour Television
● Remote Control (with batteries)
● Power Cord
● User Manual
● Warranty Card
● Stand
● Stand Screws (QTY6)

If any of these items appears to be missing or damaged, please contact TECO on 1300 660 037 for assistance.

Getting Started

Please refer to the following sections for detailed instructions about connecting the audio/video (AV) device of your LCD TV and view your favourite programmes or movies. These sections describe the basic procedures required to set up your TV for easy and convenient viewing.

Installing the stand

1. To avoid damaging the LCD TV, two or more people should carry the TV.

2. Carefully place the LCD TV faced down on a soft cloth or cushion on a table or flat surface.

1
2
3
Stop
Press ▼ / ▲ button to select Stop, press OK to stop.

Repeat All
Press ▼ / ▲ button to select Repeat option , press OK to select Repeat none/all/1.

Music
Press ▼ / ▲ button to select Music, press OK to play background music.

Playlist
Press ▼ / ▲ button to select Playlist , press OK to enter.

Info.
Press ▼ / ▲ button to select Info , press OK to enter. You can see the detail information of picture.

Rotate
Press ▼ / ▲ button to select Rotate. You may choose direction revolving or reversed direction revolving
Zoom in/Zoom Out
You can choose to enlarge or reduce the picture.
Move View
If the picture is big enough to surpass the screen, you may use this function to move the picture.

Media Operation

Note: Before operating Media menu, Plug in USB device, then press SOURCE button to set the Input Source to Media.
Press ▼ / ▲ button to select Media in the Source menu, then press OK to enter.
Press ▲ / ▼ button to select the option in the main Media menu, then press OK button to enter.

Photo

Press ▲ / ▼ button to select PHOTO in the main menu, then press OK button to enter.
Press MENU button to return back to the previous menu and EXIT button to quit.
Press ▲ / ▼ button to select drive disk you want to watch, then press OK button to enter.
Press ▲ / ▼ button to select return option to back to the previous menu.
Press ▲ / ▼ button to select the file you want to watch in the file selecting menu, then press media button to display picture.
When highlighting the option you select, the file information will appear on the right and picture will be previewed in the center.

Basic Function (Photo)

Press DISPLAY button to display function menu.

Pause
Press ▲ / ▼ button to select Pause option, press OK to interrupt the picture briefly.

Prev.
Press ▲ / ▼ button to select Prev., press OK to display the previous picture.

Next
Press ▲ / ▼ button to select Next, press OK to display the next picture.

Inserting the Remote Control Batteries

Insert the two AAA batteries provided into the remote control as described below:

Step1 Press and lift the back cover up to open the battery compartment of the remote control.
Step2 Insert two AAA size batteries. Make sure to match the (+) and (-) ends of the batteries with the (+) and (-) ends indicated in the battery compartment. Snap the cover back into place.
Connecting Power

1. Connect the supplied power cord to the AC IN jack on the rear of your TV.
2. Connect the other end of the power cord to a power outlet.

To correctly unplug the power cord: First, press POWER button to turn off your TV; second, turn off the switch from the back of your TV and the main power; and then unplug the power cord.

Wall outlet

Power cord (100-240V~ 50/60Hz)

Setup Menu

Press **MENU** button to display the main menu.
Press ◄ / ► button to select **SETUP** in the main menu.

1. Press ▼ / ▲ button to select the option that you want to adjust in the **SETUP** menu.
2. Press ◄ / ► button to adjust.
3. After finishing your adjustment, press **MENU** button to save and return back to the previous menu.

OSD Language
Press ▼ / ▲ button to select **OSD Language**, then press OK button to enter sub-menu. Press ▼ / ▲ / ◄ / ► button to select OSD language, default setting is English.

TT Language
Press ▼ / ▲ button to select **TT Language**, then press OK button to enter. Press ▼ / ▲ to select: West, East, Russian, Arabic, Farsi.

Hearing Impaired
Press ▼ / ▲ button to select Hearing Impaired, then press OK button to select On or Off.

PVR File System
Press ▼ / ▲ button to select **PVR File System**, then press OK button to enter sub-menu.
Press ▼ / ▲ button to select Check PVR File System, then press OK button to enter. Then it will check the USB

19

Basic Operations

① Turn on the LCD TV

Press the POWER button on the control panel or remote control to turn on or off the power of LCD TV. The indicate light is blue when power ON and red when power OFF.

② Switch the input source

Press the SOURCE button on the control panel to switch the video input signal. Press channel + - to select the input source. Then press volume + - to confirm.

Press the SOURCE button of remote control to switch the video input signal source between ATV、DTV、Media、AV1、AV2、S-Video、PC、Component1、Component2、HDMI1、HDMI2.

③ Adjust volume

Press volume + - of control panel or of remote control to increase or decrease volume.

④ Select the channel

Press channel +/- to increase or decrease the channel numbers. Press channel return to switch to the previously viewed channel.

⑤ Select video mode

Press the P.MODE button to select your favourite video mode: dynamic, standard, mild and personal.

⑥ Display

Press the DISPLAY button to display the information of the current channel.

⑦ Select the screen ratio

Press the ASPECT button to switch display modes: auto, 4:3, 16:9, zoom 1, zoom 2.

⑧ Mute

Press the MUTE button to disable the audio output.

10

Hotel Mode

Press ▼ / ▲ button to select Hotel Mode, then press ▲ / ▼ buttont to select On or Off.

Source Lock

Press ▼ / ▲ button to select Source Lock, press OK button to enter the submenu, then press ▼ / ▲ button to select source you want to lock, press ▲ / ▼ button to select Off or On.

Default Source

Press ▼ / ▲ button to select Default Source, press OK button to enter the submenu, then press button to select source you want. Boot Source If you select Off, the default source will be the last source you select before you turn off the TV.

Default Prog (For ATV Mode)

Press ▼ / ▲ button to select Default Prog, then press ▲ / ▼ button to select program you want. Only when you select the TV as the Boot Source, you can select the Boot Channel. If you select "Off", the default program will be the last channel you select before you turn off the TV.

Max Volume

Press ▼ / ▲ button to select Max Volume, then press ▲ / ▼ button to adjust. After set the Max Volume. The volume can't be adjusted above the Max Volume.

Clear Lock

Press ▼ / ▲ button to select Clear Lock, then press OK button to clear the setting you have done before.

EPG (only available in DTV mode)

Press the button EPG in the remote control to enter EPG menu.
Press the RED button to enter the sub-menu. You can choose the time of the appointment to record you want.
Press the GREEN button to display the detail information about the program.
Press the YELLOW button to display the schedule list that you can see the settings you have done before.
Press the BLUE button to set the time you want to remind the program you want to see.
Press EPG button or EXIT button to exit.

Select Input Source

Press the SOURCE button to select input source, press ▼ / ▲ to select the input source and then press OK button to enter.
Using the OSD MENU

The On-Screen Display (OSD) menu system provides a quick and simple method to adjust LCD TV base setting. OSD menu can be viewed using both the remote control and the control buttons on the front panel.

Channel Menu

Press **MENU** button to display the main menu.
Press ◄ / ► button to select **CHANNEL** in the main menu.
1. Press ▼ / ▲ button to select the option that you want to adjust in the **CHANNEL** menu.
2. Press OK button to enter.
3. After finishing your adjustment, press **MENU** button to save and return back to the previous menu.

Auto Tuning
Press ▼ / ▲ button to select Auto Tuning, then press OK button to start auto search.

ATV Manual Tuning
Press ▼ / ▲ button to select ATV Manual Tuning, then press OK button to enter sub-menu.
Press ◄ / ► button to select channel number you want to store.
Press ▼ / ▲ button to select Color System. Press ◄ / ► button to select option you want
Press ▼ / ▲ button to select Sound System. Press ◄ / ► button to select option you want.
Press ▼ / ▲ button to select Fine-Tune. Press ◄ / ► button to adjust a suitable tune that make you watch comfortably.

After changes settings of the OSD menus, the new settings are confirmed automatically when OSD picture vanish, even did not press the menu to exit the OSD system.

Lock Menu

Press **MENU** button to display the main menu.
Press ◄ / ► button to select **LOCK** in the main menu.
1. Press ▼ / ▲ button to select the option that you want to adjust in the **LOCK** menu.
2. Press ◄ / ► button to adjust.
3. After finishing your adjustment, press **MENU** button to save and return back to the previous menu.

Lock System
Press ▼ / ▲ button to select Lock System, then press OK button and enter password to unlock following settings. Press ◄ / ► button to turn On or turn Off Lock System. (Default password is '0000'.)

Set Password
Press ▼ / ▲ button to select Set Password, then press OK button to enter sub-menu to set new password.

Block Program
Press ▼ / ▲ button to select Block Program, then press OK button to enter sub-menu.
Press ▼ / ▲ button to select the program you want to lock, then press green button on your remote control.
(To unlock program, input the password you set.)
Press OK button to save setting and MENU button to go back to the previous menu.

Parental Guidance
Press ▼ / ▲ button to select **Parental Guidance**, then press OK button to enter sub-menu to select.
(Available options are: ALL, G, PG, M, MA, AV, R, No Block)

Key Lock
Press ▼ / ▲ button to select **Key Lock**, then press ◄ / ► button to select Off or On. When Key Lock's statue is on, you can't use the key panel button.

Hotel Mode
Press ▼ / ▲ button to select Hotel Mode, then press OK button to enter.

Time Menu

Press **MENU** button to display the main menu.
Press ◄ / ► button to select **TIME** in the main menu.
1. Press ▼ / ▲ button to select the option that you want to adjust in the **TIME** menu.
2. Press ◄ / ► button to adjust.
3. After finishing your adjustment, press **MENU** button to save and return back to the previous menu.

Time Zone (For DTV Mode)
Press ▼ / ▲ button to select Time Zone, then press OK button to enter sub-menu. Press ▼ / ▲ / ◄ / ► button to select time zone.

Sleep Timer
Press ▼ / ▲ button to select Sleep Timer, then press OK button to enter sub-menu. Press ▼ / ▲ button to select. (Available options are: Off,10min, 20min, 30min, 60min, 90min,120min,180min, 240min).

Auto Standby
Press ▼ / ▲ button to select Auto Standby, then press OK button to set the time to turn off the TV: Off, 3H, 4H, 5H (H stands for Hour).
Tip: If the remote control does not operate, it will close down automatically.
If you do any operation, it will reset the time.

NOTE:
The Clock will change with the area which you have selected in the Time Zone.

Press ▼ / ▲ button to select AFC. Press ◄ / ► button to select On or OFF.
Press ▼ / ▲ button to select search, then press OK button to start tuning.
Press red button on your remote control to save the settings and menu button to back to the previous menu.
DTV Manual Tuning
Press ▼ / ▲ button to select DTV Manual Tuning , then press OK button to enter sub-menu.
Press ◄ / ► button to select channel, then press OK button to search program.

Program Edit
Press ▼ / ▲ button to select Program Edit , then press OK button to enter sub-menu
Under ATV Mode
This option has five functions.
Use Red button to delete the current channel.
Use Green button to rename the current channel.
Use Yellow button and the ▲ /▼ arrow button to move the current channel.
Use Blue button to skip the current channel.
Use FAV button to set the current channel for favour.

Under DTV Mode
This option has three functions.
Use Red button to delete the current channel.
Use Blue button to skip the current channel.
Use FAV button to set the current channel for favor.
Picture Menu

Press **MENU** button to display the main menu.
Press ◀ / ▶ button to select **PICTURE** in the main menu.
1. Press ▼ / ▲ button to select the option that you want to adjust in the **PICTURE** menu.
2. Press **OK** button to enter.
3. After finishing your adjustment, press **MENU** button to save and return back to the previous menu.

Picture Mode
Press ▼ / ▲ button to select **Picture Mode**, then press **OK** button to enter sub-menu. Press ▼/▲button to select. (Available Picture mode: Personal, Dynamic, Standard,Mild).
You can change the value of contrast, brightness, colour and sharpness when the picture is in personal mode.
TIP: You can press **PMODE** button on the remote control to change the Picture Mode directly.

Contrast/Brightness/Color/Tint/Sharpness
Press ▼ / ▲ button to select option, then press OK button to enter sub-menu. Press ◀ / ▶ button to adjust.

NOTE:
Contrast: This item can adjust the highlight intensity of the picture, but the shadow of the picture is invariable.
Brightness: This item can adjust the optical fiber output of the entire picture, it will effect the dark region of the picture.
Colour: This item can adjust the saturation of the colour based on your own like.
Tint: This item may use in compensating color changed with the transmission in the NTSC code.
Sharpness: This item can adjust the peaking in the detail of the picture.
Colour Temp: This item can increase or reduce warm colour of the picture personally (red), and the cool colour personally (blue) according to what your like. The choice of COOL, that means it will increase the blue tone for the white. The choice of NORMAL, that means it will increase the normal colours for the white. The choice of WARM, it will increase the red colour for the white.
Noise Reduction: This item can reduce the sound intensity.

14

Sound Menu

Press **MENU** button to display the main menu.
Press ◀ / ▶ button to select **SOUND** in the main menu.
1. Press ▼ / ▲ button to select the option that you want to adjust in the **SOUND** menu.
2. Press ◀ / ▶ button to adjust.
3. After finishing your adjustment, press **MENU** button to save and return back to the previous menu.

Sound Mode
Press ▼ / ▲ button to select **Sound Mode**, then press **OK** button to enter sub-menu. Press ▼/▲button to select. (Available Sound mode: Standard, Music, Movie, Sports, Personal).
You can change the value of Treble and Bass when the sound is in USER mode.
TIP: You can press **SMODE** button on the remote control to change the Sound Mode directly.

Treble/Bass/Balance
Press ▼ / ▲ button to select option, then press OK button to enter sub-menu. Press ◀ / ▶ button to adjust.
Auto Volume
Press ▼ / ▲ button to select Auto Volume, then press OK button to select On or Off.
SPDIF MODE
Press ▼ / ▲ button to select SPDIF MODE, then press OK button to select Off, PCM or Auto.
AD Switch (For DTV Mode)
Press ▼ / ▲ button to select **AD Switch** , then press OK button to enter sub-menu. Press ▼ / ▲ button to select On or Off. Press ▼ / ▲ button to select AD Switch, then press ◀ / ▶ button to adjust volume.
TIP: AD is short for Audio Description. When you select On, it can help the Visual impaired by the assisted audio track that use the voice to describe the picture.

NOTE:
Balance: This item can adjust the speaker's output, it enables you to hear best from your position.
Auto Volume: This item is for reducing the difference between channel and program's volume automatically. This function will also reduce the fluctuation of the sound.

15

Quick 5 Step Operating Guide

1️⃣ Load your dryer loosely until it is no more than **TWO THIRDS FULL**. Clothes must tumble freely in a dryer. Don't cram them in. Wet clothes fluff up when dry.

Overloading will:
- Reduce efficiency
- Increase drying time
- Increase the risk of creasing

Do not load clothes or other articles which are dripping wet into your dryer.

2️⃣ Select one of the two (2) temperature settings.

TEMPERATURE CONTROL

TIME CONTROL

- ☼ 'Warm' for delicate items which can shrink, such as synthetics, underwear, etc.
- ☀ 'Hot' for heavy, durable items such as towels and flannelette sheets.

3️⃣ Select the drying time.

Turn the knob control in the direction of the arrow only (clockwise). Turning the knob in opposite direction (counter-clockwise) will damage the timer.
This damage will not be covered by product warranty.

4️⃣ Switch On
The dryer will not operate unless the safety button on the door is fully pressed in.

DOOR
SAFETY
SWITCH
BUTTON

5️⃣ Clean Lint Filter
After every load clean the lint filter located at the front of your dryer to reduce drying times and avoid overheating.

STANDARD FEATURES
Reversing Action
The drum is designed to turn one minute in each direction, clockwise and anti-clockwise. This reduces tangling and gives more even drying in a shorter time.

Cooling Down
At the end of the drying cycle, there is automatically a time of no heat, to cool down the load and minimise creasing.

Useful Hints

- Never tumble dry the following: Delicate items such as net curtains, woollen, silk, fabric with metal trim, nylon tights, bulky materials such as anoraks, blankets, eiderdown sleeping bags, feather quilts and any item containing rubber foam or materials similar to foam rubber.

- Do not place in your dryer undergarments such as bras and corsets that contain metal reinforcements. Your dryer may be damaged if metal parts were to come loose from the garment. Place such items in a bag designed for this purpose.

- For nylon socks and other small light items, place them in a bag designed for this purpose. This will stop these items being caught in the lint filter cavity.

- Check and empty pockets. Clips, pens, nails and pins can damage both the dryer and your clothes. Other items such as matches or cigarette lighters will cause a fire.

- Close all press studs, hooks, eyes and zips that may catch on something else. Tie all belts and apron strings to prevent tangling.

- Drying time will depend on fabric type and construction, load size and wetness. Save time and money and always spin the load as dry as possible in your washing machine.

- Drying time will also be affected by voltage fluctuations, room temperature and humidity. Clothes will dry more slowly on a cool or humid day.

- For best results, sort the load according to fabric types. Such as heavy items which may take longer to dry, eg towels, flannelette sheets etc, than ones which dry quickly, eg poly/cotton shirts and sheets.

- Avoid drying dark clothes with light coloured items such as towels as lint will show on the dark clothes.

Note: Some fabrics will collect lint from other clothes and items. Separate the lint 'givers' and the lint 'collectors' to minimise this problem.
Clothes that give lint include towels, nappies, chenille. Clothes that collect lint include corduroy, synthetics and permanent press garments.

- If individual items are still damp after drying, set a 30 minute post drying time. This will be necessary particularly for multilayered items (eg collars, pockets, etc).

- Always clean the lint filter - this will reduce drying time and save you money.

Installation Instructions

You can choose to put your dryer:-
- on the floor.
- on a workbench.
- on a wall, upside down or upright, using the included mounting kit.
- on top of a front load washing machine (using a stacking kit available as an optional extra).

The appliance must not be installed behind a lockable door, a sliding door or a door with a hinge on the opposite side to that of the tumble dryer in such a way that a full opening of the tumble dryer door is restricted.

Stacking Kit
You can use a stacking kit if you want to mount your dryer on top of a Simpson front load washing machine. Use the kit part number DKSK03. Refer to the kit instructions on how to install.

Do not install your dryer in a cupboard or small un-vented laundry unless you are using a venting kit.
There are 2 VENTING OPTIONS
- front
- rear - using a venting kit (optional extra)

Venting Kit
DVK005 - Through the wall
DVK006 - Universal flexible hose
Important: Use only kits approved by Electrolux Home Products Pty Ltd with your dryer. Contact the Electrolux Home Products Pty. Ltd. Spare Parts Centre for the list of approved kits. The exhaust duct must not exceed 2 metres in length and 100mm in diameter.
If connecting the dryer to a common ducting system, safety advice should be requested from the manufacturer.

If you choose to use an optional vent kit, the exhaust grille at the front of the dryer will need to be replaced with the outlet cover from the back of the dryer. Gently prise open the grille, using a thin bladed tool. Next, remove the cover from the back and clip it into the grille space at the front. The exhaust grille is not required when using a vent kit.

INLETS

DRYER

STACKING KIT

WASHING MACHINE

NAME BADGE

TEMPERATURE CONTROL

TIME CONTROL

DOOR SAFETY SWITCH BUTTON

EXHAUST GRILLE

OUTLET COVER

The exhaust grille has a range of positions, which allows you to select the optimum exhaust air angle. Simply hold the grille and rotate it until it hits the built-in stop.

removable exhaust grille
Name Badge
You can invert the name badge when you want to mount your dryer upside down on the wall.
Use a suitable tool (such as a thin bladed tool). Unclip the badge from the panel, invert and clip back.

You can position the vent kit at the back of the dryer to remove air upwards or sideways.

air flow

air flow

Inlet and outlet points need clear airflow to prevent overheating, so ensure there is adequate ventilation. (i.e. open window or external door.)

If a venting kit is used and the exhaust is discharged out of the room, there must be adequate ventilation to avoid the back flow of gases into the room from appliances burning other fuels, including open fires, when operating the tumble dryer. This is not applicable where a venting hose is directed to an open window. The exhaust air must not be discharged into a flue which is used for exhausting fumes from appliances burning gas or other fuels.

USEFUL HINTS (continued)

- The laundry must be thoroughly spun before tumble drying.

- Easy-care items eg shirts, should be briefly pre-spun before drying (depending on the crease resistance approximately 30 seconds)

- To avoid static charge when drying is completed, use either a fabric softener when you are washing the laundry or a fabric conditioner specifically for tumble dryers.

- Remove the laundry when the dryer has finished drying.

- Do not over-dry laundry, this avoids creasing and saves energy.

- Clothes or towels containing sand or grit should be washed first.

To help you, here is a list of the average weights of some common laundry items.

Sheet	700 - 1000g
Tablecloth	400 - 500g
Kitchen towel	70 - 120g
Table napkin	50 - 100g
Towelling hand towel	150 - 250g
Bathrobe	1000 - 1500g
Men's shirt	200 - 300g
Pillowcase	100 - 200g
Men's pyjamas	400 - 500g
Ladies nightdress	200 - 250g
Bath towel	300 - 400g

TROUBLESHOOTING

Check the points listed here **before** you call for help, and **make sure that you have followed the Important Safety Information on pages 2 & 3.**

If you can't start your dryer, check these probable causes.

- Plug is not firmly in socket, or power not turned on.
- You have blown a fuse. Check that power point with another appliance.
- You have not closed the dryer door or pushed in the door safety switch button.
- You have not turned the control knob to the setting you want.

If your clothes are still wet:

- The selected drying time was insufficient. Turn the control knob to a longer time setting.
- Longer time may be needed when the room temperatures is 10°C or less.
- Check that the lint filter is not blocked.
- Check to see that you have read all the instructions carefully.
- Contact the Service Centre if you are still having problems. Write down the model and serial numbers and the date of purchase before you ring. The Service Centre will need this information.

Important
To operate efficiently the clothes dryer must have an unrestricted air supply and exhaust ventilation.

Service calls resulting from installation where ventilation is restricted are not covered by warranty.

THE COST OF THIS TYPE OF CALL WILL BE CHARGED TO THE CUSTOMER.

Should you require further instructions in the use and care of your clothes dryer please contact the CUSTOMER CARE CENTRE on the phone numbers listed:

Australia.... **1300 363 640 8am to 7pm EST & 8pm EDST**
Monday to Friday

New Zealand... **(09) 573 2384 8am to 5pm**
Monday to Friday

If you have a warranty or spare parts enquiry you should call the number listed on page 7.

ACCESSORIES

You can buy both the venting kits and the stacking kit (as mentioned on page 4) from you local appliance shop or Electrolux Home Products Pty. Ltd. Spare Parts Distributor.

LINT BUILD-UP IS A FIRE HAZARD
A clean lint filter reduces drying times, saves energy and avoids overheating. Overheating may also damage your clothes.

What happens if I forget to clean the lint filter?

Drying Time

tripled
doubled
normal

Number of usages with an unclean lint filter
(based on laboratory tests using a load of new towels)
The lint filter is located at the front of your dryer at the bottom of the door opening.
You must clean this lint filter after every load.
To remove the lint filter open the door and press the two pads together. Pull the lint filter out of the pocket.
LINT FILTER

Open apart the lint filter and wipe or peel off the lint.

Ensure the lint filter 'clicks' when replacing. It can be inserted into the pocket either way.

- Never operate your dryer without the lint filter.
- Do not allow lint to build up around your dryer.
- A torn or damaged lint - filter must be replaced immediately.
- Overloading can increase lint build-up because the airflow is reduced.

To avoid potential fire hazards, we recommend that you pay a qualified service technician to periodically clean your dryer. You must do this also when you change your mounting from upright to inverted, or vice versa.

DRYING GUIDE
Your load, when dry must not exceed the rated capacity.
- 4kg for the 4kg Machine
- 5kg for the 5kg Machine
- 6kg for the 6kg Machine
(See page 6 for a table of average weights of laundry items)

Always check your labels for the drying symbols which the International Care Labelling Code now uses.

May be tumble dried   Normal drying (high temperature)

Do Not Tumble Dry   Delicate drying (low temperature)
- **Permanent press and synthetics** - take out as soon as the dryer stops to reduce wrinkles.

- **Woollen articles** - not recommended. Pull them to their original shape, then dry them flat.

- **Woven and loop knit materials** - may shrink, by varying amounts, depending on their quality. Do not use the 'hot' setting for these fabrics. Always stretch them out immediately after drying.

- **Fibre or leather materials** - always check the manufacturer's instructions.

- **Baby clothes and night gowns** - acrylic clothing or sleepwear use only on the 'warm' setting.

- **Rubber and plastics** - Do not dry any items made from or containing rubber or plastics, such as aprons, bibs, babies' waterproof napkins, curtains, tablecloths, shower caps, clothes fitted with foam rubber pads, pillows, galoshes, or rubber coated tennis shoes.

- **Fibreglass** - not recommended. Glass particles left in the dryer could be picked up by your clothes the next time you use the dryer, and irritate your skin.

During the drying cycle, if you want to
- add or take out clothes, or
- check the dryness of the load,

turn down the timer to 'Airing' for at least one minute before opening the door. This is to prevent scorching or possible self combustion of the fabric.

Fabric softeners or similar products should not be used in a tumble dryer to eliminate the effects of static electricity unless this practice is specifically recommended by the manufacturer of the fabric softener or product.

Note: We strongly advise against the use of fabric conditioners of the sheet type that are added to the clothes in the drum. These products may lead to rapid blockage of the lint filter and inefficient operation of your dryer.

Contents

Conditions of Use

This appliance is intended to be used in household and similar applications such as:

- Farm Houses.
- By clients in serviced apartments, holiday apartments and other residential type environments.

It must not be used for purposes other than those for which it was designed.

Important Safety Instructions

DRYER SAFETY

Failure to follow these safety instructions could damage the dryer or your clothes.
You may then not be covered by warranty for this damage.

Only plug this appliance directly into an AC power supply, which is properly earthed and has the correct voltage. See the serial number sticker located on the top of the door opening for voltage information.
CAUTION: If this appliance is supplied from a cord extension set or electrical portable outlet device, the cord extension set or electrical portable outlet device must be positioned so that it is not subject to splashing or ingress of moisture. For safety reasons we strongly advise against the use of double adaptors, extension cords or power boards.

This tumble dryer is not intended for use by young children or infirm persons without supervision. Young children should be supervised to ensure that they do not play with the appliance.

IMPORTANT: If the electrical cord of this appliance is damaged, it must be replaced by the Manufacturer, Authorised Service Agent or similarly qualified person in order to avoid a hazard.

FIRE HAZARDS

Some fabrics are not suitable for tumble drying. The following MUST NOT be placed in your dryer due to the risk of a fire or an explosion:

• Items that have been spotted or soaked with vegetable oil, cooking oil, suntan oil, linseed oil, salad oil, lubrication oil or grease. Oil affected items can ignite spontaneously, especially when exposed to heat sources such as in a tumble dryer. The items become warm, causing an oxidation reaction in the oil. Oxidation creates heat. If heat cannot escape, the items can become hot enough to ignite. Piling, stacking, or storing oil-affected items can prevent heat from escaping and create a fire hazard. If it is unavoidable that fabrics that contain vegetable or cooking oil, or have been contaminated by hair care products be placed in a tumble dryer, they should first be washed in hot water with extra detergent - this will reduce, but not eliminate the hazard. The 'cool down' cycle of tumble dryers should be used to reduce the temperature of the items. They should not be removed from the tumble dryer or piled while hot.

• Items that have previously been cleaned in, washed in, or spotted with petrol/gasoline, industrial chemicals used only for cleaning, dry-cleaning solvents or other flammable or explosive substances. Highly flammable substances commonly found around the house include acetone, (nail polish remover) denatured alcohol, petrol/gasoline, kerosene, some spot removers, turpentine, waxes and wax removers. Items containing foam rubber (also known as latex foam) or similarly textured rubber-like materials. Foam rubber materials can produce fire by spontaneous combustion when heated.

• Rubber-backed articles, clothes fitted with foam rubber pads, pillows, rubber boots and rubber-coated sports shoes.

For your safety, and to reduce the risk of fire or an explosion, DO NOT store or use petrol or other inflammable vapours and liquids near your dryer.

Electrolux Warranty

FOR SALES IN AUSTRALIA AND NEW ZEALAND
APPLIANCE: SIMPSON DRYER

This document sets out the terms and conditions of the product warranties for Electrolux Appliances. It is an important document. Please keep it with your proof of purchase documents in a safe place for future reference should you require service for your Appliance.

1. In this warranty
   (a) 'acceptable quality' as referred to in clause 10 of this warranty has the same meaning referred to in the ACL;
   (b) 'ACL' means Trade Practices Amendment (Australian Consumer Law) Act (No.2) 2010;
   (c) 'Appliance' means any Electrolux product purchased by you accompanied by this document;
   (d) 'ASC' means Electrolux' authorised serviced centres;
   (e) 'Electrolux' means Electrolux Home Products Pty Ltd of 163 O'Riordan Street, Mascot, NSW 2020, ABN 51 004 762 341 in respect of Appliances purchased in Australia and Electrolux (NZ) Limited of 3-5 Niall Burgess Road, Mount Wellington, in respect of Appliances purchased in New Zealand;
   (f) 'major failure' as referred to in clause 10 of this warranty has the same meaning referred to in the ACL and includes a situation when an Appliance cannot be repaired or it is uneconomic for Electrolux, at its discretion, to repair an Appliance during the Warranty Period;
   (g) 'Warranty Period' means:
   (i) where the Appliance is used for personal, domestic or household use (i.e. normal single family use) as set out in the instruction manual, the Appliance is warranted against manufacturing defects in Australia for 12 months and in New Zealand for 24 months, following the date of original purchase of the Appliance;
   (ii) where the Appliance is used for commercial purposes (including being used to directly assist a business or where the Appliance is used in a multi-family communal or share type environment), the Appliance will then be warranted against manufacturing defects in Australia for 3 months and in New Zealand for 3 months, following the date of original purchase of the Appliance.
   (h) 'you' means the purchaser of the Appliance not having purchased the Appliance for re-sale, and 'your' has a corresponding meaning.

2. This warranty only applies to Appliances purchased and used in Australia or New Zealand and is in addition to (and does not exclude, restrict, or modify in any way) any non-excludable statutory warranties in Australia or New Zealand.

3. During the Warranty Period Electrolux or its ASC will, at no extra charge if your Appliance is readily accessible for service, without special equipment and subject to these terms and conditions, repair or replace any parts which it considers to be defective. Electrolux or its ASC may use remanufactured parts to repair your Appliance. You agree that any replaced Appliances or parts become the property of Electrolux. This warranty does not apply to light globes, batteries, filters or similar perishable parts.

4. Parts and Appliances not supplied by Electrolux are not covered by this warranty.

5. You will bear the cost of transportation, travel and delivery of the Appliance to and from Electrolux or its ASC. If you reside outside of the service area, you will bear the cost of:
   (a) travel of an authorised representative;
   (b) transportation and delivery of the Appliance to and from Electrolux or its ASC,

6. Proof of purchase is required before you can make a claim under this warranty.

7. You may not make a claim under this warranty unless the defect claimed is due to faulty or defective parts or workmanship. Electrolux is not liable in the following situations (which are not exhaustive):
   (a) the Appliance is damaged by:
   (i) accident
   (ii) misuse or abuse, including failure to properly maintain or service
   (iii) normal wear and tear
   (iv) power surges, electrical storm damage or incorrect power supply
   (v) incomplete or improper installation
   (vi) incorrect, improper or inappropriate operation
   (vii) insect or vermin infestation
   (viii) failure to comply with any additional instructions supplied with the Appliance;
   (b) the Appliance is modified without authority from Electrolux in writing;
   (c) the Appliance's serial number or warranty seal has been removed or defaced;
   (d) the Appliance was serviced or repaired by anyone other than Electrolux, an authorised repairer or ASC.

8. This warranty, the contract to which it relates and the relationship between you and Electrolux are governed by the law applicable where the Appliance was purchased. Where the Appliance was purchased in New Zealand for business purposes the Consumer Guarantee Act does not apply.

9. To the extent permitted by law, Electrolux excludes all warranties and liabilities (other than as contained in this document) including liability for any loss or damage whether direct or indirect arising from your purchase, use or non use of the Appliance.

10. For Appliances and services provided by Electrolux in Australia, the Appliances come with a guarantee by Electrolux that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the Appliance repaired or replaced if the Appliance fails to be of acceptable quality and the failure does not amount to a major failure. The benefits to you given by this warranty are in addition to your other rights and remedies under a law in relation to the Appliances or services to which the warranty relates.

11. At all times during the Warranty Period, Electrolux shall, at its discretion, determine whether repair, replacement or refund will apply if an Appliance has a valid warranty claim applicable to it.

12. For Appliances and services provided by Electrolux in New Zealand, the Appliances come with a guarantee by Electrolux pursuant to the provisions of the Consumer Guarantees Act, the Sale of Goods Act and the Fair Trading Act.

13. To enquire about claiming under this warranty, please follow these steps:
    (a) carefully check the operating instructions, user manual and the terms of this warranty;
    (b) have the model and serial number of the Appliance available;
    (c) have the proof of purchase (eg an invoice) available;
    (d) telephone the numbers shown below.

14. You accept that if you make a warranty claim, Electrolux and its ASC may exchange information in relation to you to enable Electrolux to meet its obligations under this warranty.

In all instances, unless the Appliance is transported by Electrolux or an Electrolux authorised representative, the Appliance is transported at the owner's cost and risk while in transit to and from Electrolux or its ASC.
