PLEASE REMEMBER, NO PLASTIC BAGS OR GREEN WASTE

Please refer to your Council's Recycling Calendar/Guide for more information.

Why recycle?

The simple truth is that landfill is not sustainable. Our landfill site, Tamala Park, is rapidly filling up and it will cost us as a community to replace this site. The Town believes that our best option is to recycle as much as possible, as soon as possible.

What happens to the recycling material in our Town?

Our contractor collects recycling materials in a separate truck to general waste. It is delivered to a materials recycling facility where it is sorted, prepared and sold on to the market.

Residential Premises

What is happening with recycling in the Town of Victoria Park?

A change is happening to recycling in the Town of Victoria Park, a change for the better! The current recycling crate system is being replaced with 240 litre yellow top recycling bin system.

Why a change?

This change has occurred due to a combination of environmental concerns, working towards 'Zero Waste', the cost of waste-to-landfill and community demand. It allows for larger amounts of recycling, more convenient placement on the kerb, and easier pick-up by our waste collection contractors.

So how will this happen?

Your black recycling crate/s will be replaced with a yellow top recycling bin in February 2009. For the vast majority of residential properties within the Town there will be no change, except that you will have a yellow top recycling bin.

What will I receive?

In February 2009, a yellow top recycling bin will arrive for you along with a recycling guide calendar. The new system will be very easy to use, with a weekly pick-up for general rubbish and a **fortnightly pick-up** for recycling.

What happens to my recycling crate?

You are welcome to keep and reuse your crate/s if you wish for personal use – or if you would prefer, you can return your crate/s to us at the Town's Depot at 199 Star St, Welshpool.

Dates to note:

**February
2009**

Delivery of new recycling bins and recycling guide calendars

Multi-unit Dwellings

Multi-unit dwellings are subject to different procedures to single unit dwellings.

In a multi-unit development, where it is impractical for each dwelling unit to be provided with its own bin, the Town will provide fewer bins and organise more frequent pick-ups. The Town will determine the number of bins and collection frequency to be provided.
